

SMOKE HAZE AT BOMBAY.

The photograph on page 245 was taken by Mr. V. V. Soboni at about 1000 hrs. I.S.T. from a steamer approaching Bombay harbour on the 3rd December, 1949. It shows the kind of smoke haze that appears over Bombay in winter mornings, mention of which has been made by Mukherjee and Karve in their paper "Visibility at the Colaba Observatory, Bombay" appearing in this issue of the Journal. The land's end appearing in the right of the picture is Colaba.
